

# Project Report

By Frank Botterill

## Sungei Biawak Power Station Sarawak Malaysia

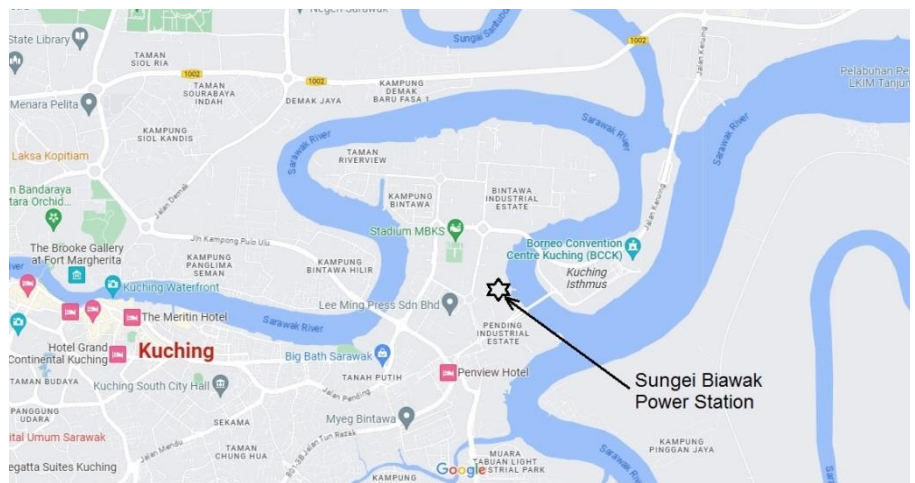

These notes are my recollections of my one site visit in 1977. At the time my late colleague John Oakley drew an artist's impression of the final station.

This was a diesel powered station with river water cooling. My Company designed the Mechanical, Electrical and Civil works. Construction was undertaken by specialist Contactors.

My visit was brief and involved review of tenders for other contracts.
